

ALİ MERT ÖZDEMİR

Energy Systems Engineer (M.Sc.) | Renewable Energy & Energy Markets | Energy Data & Reporting | German B1+

Phone: +49 1573 364 0354 Email: alimertoziem@gmail.com

LinkedIn: linkedin.com/in/alimertoziem96

Berlin, Germany · DOB 20/10/1996 · Nationality: Turkish

SUMMARY

Energy engineer with a B.Sc. in Energy Systems Engineering and an M.Sc. in Energy Management in Berlin. Practical background across rooftop solar PV project support, wind turbine manufacturing and an electric vehicle conversion project, with a strong interest in the German energy market, battery storage and the energy transition. Comfortable turning energy data into clear, decision-ready reports with Power BI, SQL and Python.

EDUCATION

M.Sc. Energy Management

Berlin School of Business and Innovation 09/2024 – 09/2026 · Berlin, Germany

- Focus on energy markets, energy systems and the energy transition; data-driven analysis and sustainable solutions.

B.Sc. Energy Systems Engineering

Yaşar University 09/2016 – 06/2022 · İzmir, Turkey

- Engineering background in energy systems, power generation and renewable energy technologies.

EXPERIENCE

Hospitality Staff (Part-time)

Marriott Hotel 03/2025 – 07/2026 · Berlin, Germany

- Part-time work alongside M.Sc. studies; service, event set-up and teardown.

Founder & Manager

Charles Milk Bar 05/2023 – 08/2024 · İzmir, Turkey

- Founded and operated a small food business; daily operations and financial tracking.

Energy Engineer / Project Assistant

Elegant Energy 03/2022 – 02/2023 · İzmir, Turkey

- Supported planning and system layout design for rooftop solar PV projects.
- Prepared technical documentation for ongoing PV installations.

Intern — Wind Turbine Manufacturing

Enercon (AERO facility, İzmir Free Zone) 07/2020 – 09/2020 · İzmir, Turkey

- Wind turbine blade manufacturing — production workflows and quality control.

Co-Founder

Kornison Agency 02/2019 – 04/2020 · İzmir, Turkey

- Co-founded a social media agency; client relations and budgeting.

PROJECTS

Energy Copilot Platform for Commercial Buildings

Personal Project 2025 – 2026 · Berlin, Germany

GitHub: github.com/alimertoziem/Energy-Copilot-Platform

- Built a 9-page Power BI report (50+ DAX measures) on commercial building energy performance: EUI benchmarking, CRREM decarbonisation pathways, HVAC and consumption analysis, GHG Scope 1/2/3.
- Designed the underlying data model in a Microsoft Fabric Lakehouse using a Bronze / Silver / Gold structure for building and metering data.
- Modelled battery dispatch logic against EPEX Spot day-ahead prices, taking EU Battery Regulation 2023/1670 requirements into account.

Eco Electric Vehicle (EEV) Project

University Sustainability Project 2018 – 2019 · İzmir, Turkey

- Contributed to converting a diesel vehicle into a fully electric vehicle for a university competition — battery system layout, powertrain integration and electrical safety.

SKILLS

Energy & Engineering

Rooftop solar PV planning & system layout, battery storage and dispatch concepts, energy markets (EPEX Spot day-ahead), CRREM, GHG Scope 1/2/3, EU Battery Regulation 2023/1670, PVsyst, AutoCAD

Data & Reporting

Power BI (DAX, data modelling), Microsoft Fabric (Lakehouse, Delta Lake), SQL and Python (pandas, PySpark) — used end-to-end to build the Energy Copilot Platform. MS Office / Excel

Working Style

Analytical thinking, structured working, adaptability, team collaboration
