

GRESB-aligned · Performance readiness

Indicative — not an official GRESB score or submission

Reporting year 2025

The GRESB Real Estate **Performance Component** scores asset performance across energy, GHG, water, waste and building certifications (28 indicators). EnergyLens populates the **energy (EN1)** and **GHG (GH1)** indicators from your metered data; the readiness of the rest is shown below. This is not an official GRESB score — a GRESB result requires GRESB membership and submission through the GRESB portal, with data coverage meeting the 75% (area × time) threshold.

DATA COVERAGE

ASSETS REPORTED

1/1

with performance data

COVERAGE

100 %

GRESB threshold ≥ 75%

FLOOR AREA

5,200 m²

EN1 · ENERGY

TOTAL ENERGY

424 MWh

metered consumption

ENERGY INTENSITY

82

kWh/m²·yr

RENEWABLE SHARE

16.8 %

on-site solar self-consumed

GH1 · GHG EMISSIONS

SCOPE 1

3.5

tCO₂e — direct

SCOPE 2 (LOCATION)

118.1

tCO₂e — grid

SCOPE 3 (EST.)

698.7

tCO₂e — value chain

GHG INTENSITY

0.158

tCO₂e/m²

Indicator Readiness			
Indicator	What GRESB Asks	Status	Note
EN1 · Energy	Energy consumption + intensity, with ≥75% data coverage	Ready	Metered energy + intensity available
GH1 · GHG	Scope 1/2/3 emissions + intensity	Ready	Scope 1+2 metered, Scope 3 estimated
BC1/BC2 · Certifications & ratings	Building certifications + energy ratings (EPC)	Partial	EPC pre-assessment available; formal certificates to add
WT1 · Water	Water withdrawal + intensity	Missing	Not tracked by EnergyLens
WS1 · Waste	Waste generated + diversion	Missing	Not tracked by EnergyLens
Management · Targets / risk / tenant engagement	Policies, targets, risk management, tenant engagement	Partial	Targets + risk via ESRS narrative / CRREM; tenant engagement to provide
Prepared as a GRESB Performance readiness view from metered energy + the GHG inventory. It is indicative and is not an official GRESB score, rating or submission; a GRESB result requires GRESB membership and the GRESB portal, with the assessment's own methodology, like-for-like (year-on-year) reporting and data-coverage thresholds. Water, waste and formal building certifications are out of scope here.
